Description of Software: CineaCloud

CineaCloud is an online solution for filmmakers to manage their production pipeline. The platform consists of 22 apps that allow content creators to organize their ideas, write their scripts, plan, budget, collaborate, and distribute their work. All on one platform.

Our website: www.cineacloud.com

Access to Software:

We will send each student a private link to their email where they can sign up for the platform. The link will be valid for 24 hours.

The link will direct them to a sign-up page. Once they have signed up, they will have full access to all 22 apps on the platform.

What to test:

1. Verification of the signup process

2. Verifying the onboarding process and creating a new project.

3. Verification of inviting team members to a project.

4. Verifying that users can create a new file for each of the apps on the platform.

5. Verifying that users are able to delete files for each app on the platform.

6. Verifying that users are able to invite team members to individual files for the different apps.

7. Verifying that users can upgrade and downgrade their plans.

8. Verify that all text fields are functioning correctly within the app.
